01 PROFILE

As a high-performing, strategic-thinking professional who has five years of experience in the web development industry, I have developed different strategies to maintain high-quality service in the least amount of time possible. Driven by passion and the natural feeling of joy, doing the work that I love helps me push to further - making sure that I develop websites to perfection. Also, my willingness to learn new things as well as absorbing new knowledge inspires me to be better, making me confident in myself and the work that I do.

02 EMPLOYMENT HISTORY

Oct 2020 — Present

Pasig

Front End Developer at Incenter Solutions

Finance of America Companies is Incenters' parent company, one of my main tasks is managing over 40+ of our websites and including FOA clients on different parts of USA. When I say managing, I'm just not referring to just keeping the website up and running, but we're in close relations with the designers for new website development, and page developments. We make our websites from scratch in the ecosystem of WordPress, integrating Gulp, CSS Preprocessors, Lando, and many more.

May 2018 — Jul 2020

Front End Developer at Bigcat Software Solutions

Bigcat Software Solutions is a combination of both my first and second jobs. As a company that focuses on being the best, they allowed me to handle different projects that are both created from scratch and from using a CMS. With my experience as a senior web developer, I was tasked to handle single page development for events, wordpress maintenance, website revamps, front-end scripting, website optimizations, and more.

Jul 2016 — May 2018

Makati

Lead Developer at Xibre Digital

Crafting visually appealing and fully functional websites through content management systems. This made me understand that in a fast-growing business such as the Web Development industry; having more done in the least amount of time is equal to a larger profit for the company. During my tenure, I handled 36 websites.
